Task #4

Create a function which returns the number of true values there are in an array.

```javascript
const arr = [true, true, true, true, false, true];

const countTrue = (arr) => {
  return arr.filter(Boolean).length;
}

console.log(countTrue(arr));

/*
    test cases:
    countTrue([true, false, false, true, false]) // output → 2

    countTrue([false, false, false, false]) // output → 0

    countTrue([]) // output → 0

    countTrue([true, true, false, false, false, false, true, false, true, true,
false, true]) // output → 6
*/
```
